THE ENEMY WITHIN

Happy motherfucking new year bitch! Now eat shit and live- dying's too good for ya- heh heh. The year ended in New York with a rising trend in people trying to burn token booths, using their kids as punching bags, and taking up mass murder as a new hobby. I must say 1995 has been a very interesting year indeed from the survivalist point of view particularly in relation to the so-called rise of the militia

movement in this cuntry. It has only gotten mainstream media attention within the past several years beginning with the Waco fiasco initiated by the fibbie piggies at the ATF. However- this movement has been active for years. The 'FBI/ ATF as jack-booted thugs' idea is nothing new. We have survivalist literature hinting them as part of 'the enemy' dating back to the 1970's- over two decades before the incidents in Waco and Oklahoma City ever occurred. In addition- some survivalist groups; such as The Order, Minutemen, Posse Comitatus, etc. have years before those two incidents had clashes with federal authorities (for more info on these we suggest a book called 'Armed and Dangerous- Rise of the Survival Right'). Unfortunately, most of these groups were ultra-right wing if not blatantly neo-nazi. This situation had given survivalists a significant image problem, which wasn't helped much several months ago when some idiots calling themselves 'The Sons Of Gestapo' decided to blow up some railroad tracks in Arizona. Now, some of the 'we're not nazi nutcases just patriotic plain old folks like you' groups are hogging up media attention to clear themselves. Many of these 'militiamen' probably aren't that bad- just a bunch of regular guys concerned about protecting themselves and their families. However- we personally don't trust in any of them and would bet that most of them are either fifty-percent over paranoid fools, cop informers, or just plain assholes that would consider us as much 'the enemy' as the government. We'd just love to see the reaction if a load of homeboys, punks, queers, ravers, squatters, ex-cons, and like outcasts went en masse with AK-47's to join the local militia in town. In fact joining one may be a security risk in of itself because the truth is records are stolen, people sell each other out, organizations are infiltrated, and sometimes the whole motherfucker itself is a front for the Man. Our advice is to fuck those militias, stay away from them, and be your own person. There's no need to join one, give them your hard earned or hard stolen cash just to dress in cammies and play soldier. You can instead just gather a small group of trusted like-minded friends and prepare by collecting knowledge and stocking supplies. Amen.

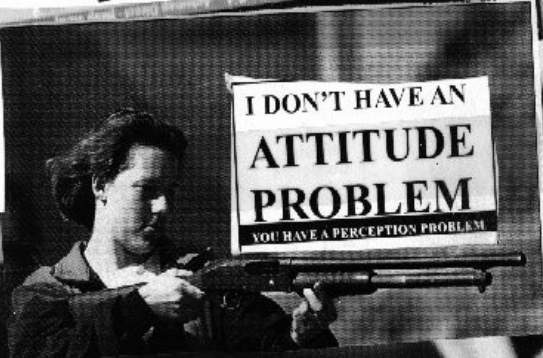

DR. MALICIOUS

Defense is very offensive

Direct inquires, letters, death threats, hate mail, bullets with our names on them, and other contributions to our world headquarters- Nihilistik Survivalist Front, c/o D.M. Santiago, 1870 Schieffelin #5E, Bronx, NY 10466, USA.

By any other name, the crack of the baton feels the fucking SAME!

Effective In Killing

SHOW THEM NO MERCY.

CUT OUT TO BE A COP!!

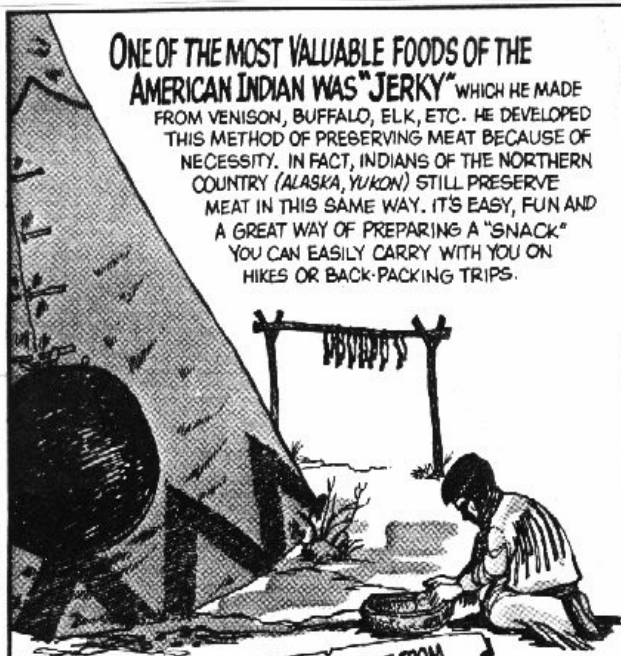

Hey you!! Yeah-you! Would you like to bust heads open, kick ass and take names, or totally fuck up other peoples fun for no reason at all and get away with it? Were you a control freak or a bully in school? Do you have a contempt for the criminals who are attempting to destroy our great country like the homeless, jay-walkers, anti-war protesters, street peddlers, purchasers of "censored" records, hippies, communists, pot smokers, flag burners, anarchists, feminists, punks, parking violators, tax evaders, underage and public alcohol drinkers, squatters, flyer pasters, sidewalk spitters, skin-heads, owners of illegal fireworks, party soers, animal rights activists, loiterers, homosexuals, freaks, people of color, and other degenerates whom we can't classify? If you answered yes to any of the above questions then maybe you'd like to become a New York City Police Officer.

In return for serving and protecting the affluent community and corporate system you will receive 20 paid vacation days, earn over \$40,000 base pay (excluding overtime of course), free family medical benefits, one year maternity leave, unlimited sick leave with full pay, full pension after 20 years of service, free parking, free public transit rides, and much, much more. Plus you don't even have to serve jury duty or testify against fellow officers in hearings.

It's a tough job and not everyone can do it. It's one that takes caring, service oriented, and community minded individuals. Because to be a New York City Police Officer you need to have Pride, Integrity, and Guts.

So the next time you see some social scum destroying the moral fabric of this great Amerikkka, someone even dare to call one of our men in blue a 'pig' and feel like cracking a nightstick on their heads, or just have that urge to harass someone- please consider becoming a New York City Police Officer.

ONE OF THE MOST VALUABLE FOODS OF THE AMERICAN INDIAN WAS "JERKY" WHICH HE MADE FROM VENISON, BUFFALO, ELK, ETC. HE DEVELOPED THIS METHOD OF PRESERVING MEAT BECAUSE OF NECESSITY. IN FACT, INDIANS OF THE NORTHERN COUNTRY (ALASKA, YUKON) STILL PRESERVE MEAT IN THIS SAME WAY. IT'S EASY, FUN AND A GREAT WAY OF PREPARING A "SNACK" YOU CAN EASILY CARRY WITH YOU ON HIKES OR BACK-PACKING TRIPS.

JERKY CAN BE MADE OF ALMOST ANY MEAT FROM BEEF TO VENISON TO PORK. HOWEVER, IF YOU USE WILD MEAT OR PORK, YOU MUST BOIL THE MEAT SLICES JUST LONG ENOUGH TO REMOVE THE RED TO INSURE AGAINST TRICHINA (A PARASITE COMMON IN MANY WILD ANIMALS).

Step 1. SLICE THE MEAT INTO $\frac{1}{8}$ to $\frac{1}{4}$ INCH STRIPS WITH THE GRAIN AND REMOVE ALL FAT.

AVOID EXTRA TOUGH MEATS.

Step 2. MARINATE THE STRIPS OVERNIGHT IN A SOLUTION OF SALT, PEPPER, ONION, GARLIC AND WORCHESTERSHIRE OR TOBACCO SAUCE IF YOU WANT HOT, SPICY JERKY.

Recipe
 1 tablespoon Salt
 1 tablespoon Onion powder
 1 teaspoon Garlic powder
 $\frac{1}{2}$ teaspoon Pepper
 Enough water to cover meat.

Step 3. DRAIN MARINATED STRIPS ON TOWELLING.

Step 4. PLACE ON THE WIRE RACKS OF YOUR OVEN SO THAT NO STRIPS ARE TOUCHING OR OVERLAPPING. BAKE AT LOWEST POSSIBLE HEAT (warm or 200°) WITH THE OVEN DOOR PROPPED SLIGHTLY OPEN FOR 2 to 3 HOURS OR UNTIL THE STRIPS ARE COAL BLACK AND CRACK WHEN BENT BUT DO NOT BREAK. YOU SHOULD PLACE A COOKIE SHEET OR FOIL IN THE BOTTOM OF THE OVEN TO CATCH DRIPS.

Your Jerky can usually be kept in sealed plastic bags or jars for at least a year without refrigeration. To carry jerky on long back-pack trips, place the plastic bags inside cloth bags to protect the plastic from tears.

COPYRIGHT UNIVERSAL PRESS SYNDICATE

Mark Hargray

THE FIRST LIGHTWEIGHT CAMPING OR "TRAVELING" FOOD WAS THE INDIAN PEMMICA, AND IS AS VALUABLE AND EASY TO MAKE TODAY AS IT WAS THEN. THE ORIGINAL PEMMICA WAS MADE FROM BUFFALO, ELK OR VENISON JERKY AND WHATEVER ELSE HAPPENED TO BE HANDY. THIS INCLUDED ALMOST ALL KINDS OF BERRIES AND NUTS AND HONEY IF IT WAS AVAILABLE.

A NOTE TO ALL YOU VEGETARIAN MOTHERFUCKERS OUT THERE—JUST USE DRIED TOFU INSTEAD OF BEEF FOR VEGAN PEMMICA. —ED.

RECIPE FOR MODERN PEMMICA

• DRIED BEEF	8 oz.
• RAISINS	8 oz.
• UNROASTED PEANUTS or PECANS	8 oz.
• HONEY	2 tsp.
• PEANUT BUTTER	4 tblsp.
• CAYENNE PEPPER	$\frac{3}{4}$ tsp.

CUT ALL FAT FROM BEEF, THEN CUT INTO THIN SLICES. DRY IN OVEN WITH OVEN AT LOWEST TEMPERATURE AND DOOR OPEN SLIGHTLY UNTIL MEAT WILL BREAK AND CRUMBLE.

POUND MEAT INTO POWDER OR GRIND USING AN ELECTRIC BLENDER.

ADD RAISINS, DRIED BLUE-BERRIES, CHOPPED DRIED APRICOTS, PEACHES, PECANS, PEANUTS.

HEAT HONEY AND PEANUT BUTTER TO SOFTEN IT, THEN BLEND INTO THE MIXTURE. ADD THE CAYENNE PEPPER AND MAKE SURE IT IS WORKED THOROUGHLY THROUGH THE MIXTURE.

IF YOU WANT TO GO COMPLETELY NATURAL, PACK THE MIXTURE INTO SAUSAGE CASINGS (AVAILABLE AT MEAT COUNTERS) OR YOU CAN PUT THE MIXTURE INTO PLASTIC "TIE BAGS."

KEEP IN A COOL, DRY PLACE. PEMMICA WILL KEEP INDEFINITELY AND CAN'T BE BEAT AS A SNACK OR LUNCHEON ON THE TRAIL.

Mark Hargray

TODAY'S SEARCH FOR HEALTHFUL, NATURAL FOODS HAS PUT A NEW FOCUS ON YOGURT, ONE OF THE OLDEST NATURAL FOODS. IF YOU HAVEN'T TRIED YOGURT YET, NOW'S THE TIME. THIS HEALTHFUL AND DELIGHTFUL FOOD IS NOT ONLY EASY TO MAKE AT HOME--IT'S VERY ECONOMICAL.

TO GROW YOUR OWN YOGURT, YOU WILL NEED A STARTER MIX AVAILABLE FROM NATURAL FOOD STORES. YOGURT IS JUST LIKE SOURDOUGH BREAD IN THAT YOU MUST KEEP A BIT OF IT TO USE AS A STARTER TO PERPETUATE YOUR CULTURE AND KEEP IT GOING.

IT'S EASY TO MAKE YOUR OWN YOGURT

IF YOU FOLLOW THESE SIMPLE STEPS:

1. HEAT ONE QUART OF FRESH MILK (THE MILK SHOULD BE WARMED--BUT NOT ALLOWED TO BOIL.)
2. ALLOW THE MILK TO COOL TO LUKEWARM TEMPERATURE.
3. PLACE ONE TABLESPOON OF YOGURT STARTER MIX IN THE BOTTOM OF A COUPLE OF MEDIUM-SIZE (PINT) JARS. THE JARS MUST FIRST BE STERILIZED IN BOILING WATER, THEN ALLOWED TO DRY THOROUGHLY. THEY SHOULD HAVE TIGHT-SEALING LIDS.

4. SLOWLY POUR THE HEATED MILK INTO THE JAR.

5. PLACE THE LIDS ON THE JARS AND CLOSE TIGHTLY. PLACE THE JARS IN A WARM SPOT WITH CONSTANT TEMPERATURE, SUCH AS IN FRONT OF A HEAT REGISTER. OR YOU CAN PLACE THE JARS IN A LARGE KETTLE, POUR IN WARM WATER AND KEEP CHANGING IT TO KEEP A FAIRLY CONSTANT TEMPERATURE. YOGURT IS READY WHEN THE LIQUID HAS CONGEALED--ABOUT 4 TO 6 HOURS.

THE YOGURT IS THEN KEPT REFRIGERATED FOR USE. IT WILL THICKEN AND CONGEAL A BIT WHEN COOL.

If you really get 'into' YOGURT...

YOU'LL WANT TO BUY A CULTURIZING UNIT. THIS LITTLE DEVICE HAS AN ELECTRICALLY HEATED BASE ON WHICH SITS PYREX GLASS CONTAINERS, AND MAKES KEEPING THE CULTURE A CONSTANT TEMPERATURE A SNAP.

© 1972 Universal Press Syndicate

Make Hand-Dipped Candles

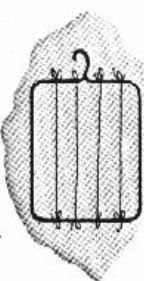

THE SAME WAY YOUR GREAT-GRANDMOTHER DID. IT'S EASY!

1. MAKE A DIPPING FRAME FROM A COAT HANGER--TIE SOFT COTTON TWINE TO FRAME.

2. WAX MUST BE MELTED IN A DOUBLE-BOILER ARRANGEMENT. USE A DISCARDED ANTI-FREEZE CAN SUSPENDED IN A HOME-CANNER...

NEVER MELT WAX OVER AN OPEN FLAME!

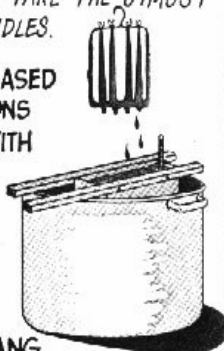

IMPORTANT--ALWAYS TAKE THE UTMOST CARE IN HANDLING CANDLES.

3. BREAK PARAFFIN OR PURCHASED WAX INTO CAN. ADD CRAYONS FOR COLORING. FILL CANNER WITH WATER. HEAT WAX TO 175° F. USE A CANDY THERMOMETER TO CHECK TEMPERATURE.

4. DIP THE DIPPING FRAME DOWN INTO THE WAX, THEN HANG IN A COOL SPOT FOR 5 MINUTES.

5. AFTER THE FIRST 10 DIPS EVERY OTHER DIP SHOULD BE A HALF DIP. 30 DIPS PRODUCES A CANDLE.

6. CLIP CANDLES FROM BOTTOM OF FRAME AND ALLOW TO HANG FOR A COUPLE OF DAYS.

URBAN WARFARE DEPT.

POOR MAN'S ARSENAL 101

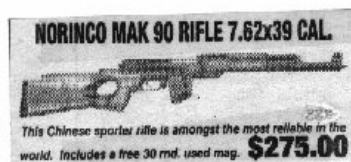

In our past issues we have outlined certain improvised weapons which could be used for self-defense. While these may work OK against street thugs, barroom drunks, and potential date rapists; the best defense for an armed intruder coming into your home is a gun. However, not all guns are created equal- some are so good that you could drop it in a quicksand pit and it'll still fire without stoppage (for example the W. German HK91 assault rifle) to so bad that you better off using a baseball bat and bad language (for example the U.S. made Davis .22 pocket pistol). But do you have a spare \$2,000+ for an HK91? We didn't think so. Some listed guns tested or owned by yours truly which are both of good quality and affordable (so even low life bums like us can pack a decent piece that won't blow up in our faces). Some gun snobs out there like that riot grr! we met with her Beretta 92F nine mm in Ann Arbor or that rich house punk in Tucson with his Dragunov sniper rifle may not like our choices but FUCK YOU. Give us money then maybe we can be as kool as you are!

SKS RIFLE MODEL 56- Our personal favorite! A 10-shot fixed magazine semi-automatic assault rifle. First utilized by russians before using the AK-47. It also uses the same caliber, the 7.62x39mm (aka 7.62mm NATO) cartridge. We've seen these priced anywhere from \$70 to \$140, but don't let

that fool you. This rifle has a proven reliability for almost 40 years. It is also a proven killer (the dude who shot at the White House and the psycho responsible for the recent Bronx massacre both used SKS's in these incidents). Since the clinton ban on imported arms, supplies of the SKS have been drying up, so if you don't have one you better get one damned quick!!

MAK90 SEMI-AUTO RIFLE- Another winner! A chinese sporter version of the AK rifle. It's barrel is shorter the SKS but a detachable magazine. Also it's about \$100 more in price and on the clinton crime bill hitlist- so if you have the extra

bucks get one of these.

MOSSBERG 500/ ITHACA 37/ REMINGTON 870/ WINCHESTER M12 and M97-
We've dumped all these shotguns in the same group because they are partically the same. In being that they're all good dependable home defense shotguns. Most have a five or six shot pump-magazine and are available in barrel of 18" to 28". We prefer 18" riotgun barrel- fucking devastating! You may want a longer one depending upon the area you live. Cheap versions of all of these may bought used as we've seen good mossberg 500 ATP6's for around \$150-\$190 used. However, winchester model 12 and model 97's may be a bit hard to find.

How to Annoy

Your Local Terrorist

**RUSSIAN
MAKAROV SEMI-AUTO**
Brand New No more to be
imported. Hi Capacity 9x18mm
Edelman's Special **\$179.99**

RUSSIAN MAKAROV/ NORINCO TOKAREV/ CZ- 52- Thanks to the breakup of the Soviet Union/ Warsaw Pact cheap imports like these had been flooding the gates. At the top of our list is the Makarov semi-auto handgun available in 9x18 mm or .380 caliber with a magazine capacity of ten rounds. I think it was the official pistol of the soviet police as well. The chinese-made Tokarev pistol uses a 9mm Parabellum caliber but it is on the anti-gunner ban list - so you better get 'em while there hot. Last but not least- is the Czech CZ 52 pistol in 7.62x25mm caliber with a 8 round magazine capacity. All of these fine handguns could be brought for \$150-\$200, shop around for the best deal.

NORINCO .380 ACP HANDGUN- A typical cheap amerikan made semi-automatic handgun. It uses a seven-shot magazine in the .380 acp caliber. The usual going price for these are anywhere from \$100 to \$200 depending upon where you get it (gun shop or street corner). Nowhere as good as the models above but it's known as the 'baby nine' on the streets and every 13-15 year gangsta kid swears by it. CAVAET EMPTOR!!

BRITISH LEE ENFIELD NO. 1 MKIII .303 CAL.

Work horse of the Great War and WWII.
in good condition. **\$74.99** and up.

BRITISH LEE ENFIELD NO. 4- This bolt action deer rifle was legend-in World War One. It uses a .303 caliber fed from a ten round fixed magazine. also it's very powerful and has quite a recoil. Many surplus rifles in good to very good condition can found VERY cheap (around \$80- \$129). While most of these rifles are good buy many tend to be old as well. It's suggested to have one examined by a gunsmith before using it for defensive purposes.

WAR BETWEEN MEN AND MACHINES. Government run by multi-national corporations. Science run amok, accompanied by global ecological destruction.

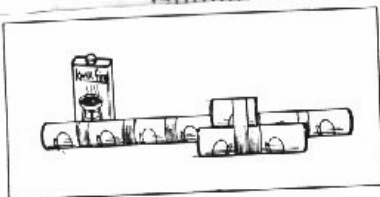

KILLING TIME

Metal Knuckle Device

Here a simple kitchen fork is shaped into a weapon that could cause serious injury. Two of the four prongs are bent in the opposite direction from the original prongs. The fork handle is then bent in a U shape and slipped over the hand, worn in a fashion similar to brass knuckles.

Beer Can Mortar

Homemade mortar-type devices constructed from a series of beer cans taped end-to-end have been encountered in Canada. The device is constructed so that the total length is about forty-eight inches, with a series of baffles in the lower cans.

A propellant such as charcoal lighter or gasoline is placed in the bottom of the device. The device is then shaken, and lit, and an explosion takes place, hurling a flame from the end of the device that reaches about twelve feet. Projectiles such as ball bearings, glass, and barbed wire may also be discharged from the device. The principle employed apparently was first used by the Vietcong in Vietnam.

Barney's Favorites

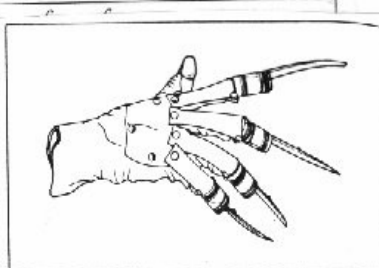

NOTICE:

Barney isn't real, he doesn't love you, he doesn't even know you're alive! Dinosaurs and people were never alive together, and if they were, Barney'd be eating your intestines while you watched. Other than that, enjoy!

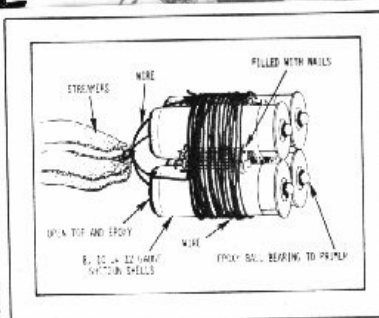

Bacteria (30,000x)

Blade Glove

The glove pictured is not an ordinary glove. Attached to the four fingers of the glove are stainless steel knife blades approximately four to five inches in length. The blades are attached by rivets to pieces of electrical conduit that are then attached to the fingers of the glove by black plastic electrician's tape. The thumb has been cut out of the glove.

By folding the fingers into a fist form, the blades can be concealed behind the wrist and the glove appears to be like one used for breakdancing, motorcycle riding, or weight lifting.

Shotgun Shell Bomb

A bomb can be constructed by wrapping four 12-gauge shotgun shells together and filling the void areas with nails. Teflon stabilizes the bomb to assure that it lands on the primer end of the shell. A small ball bearing attached to the primer acts as an impact source to discharge the shells. Upon detonation, the nails travel in all directions.

ARCHERY IS A FUN SPORT THAT CAN BE ENJOYED BY EVERYONE, OLD, YOUNG, BIG OR SMALL, and IS A GREAT EXCUSE FOR "GETTIN' OUTDOORS."

THERE ARE FOUR BASIC KINDS OF ARCHERY, WITH PLENTY OF ACTION FOR ALL: FIELD ARCHERY, TARGET ARCHERY, BOWHUNTING and BOWFISHING.

ARCHERY IS A RELATIVELY INEXPENSIVE HOBBY, BUT YOU MUST HAVE EQUIPMENT FITTED TO YOU. BETTER SPORTING GOODS SHOPS CAN HELP IN SELECTING PROPER EQUIPMENT.

TO SHOOT:

1. STAND RELAXED AND WITH YOUR FEET POINTED AT AN ANGLE AWAY FROM THE TARGET. THE MODEL SHOWN IS LEFT-HANDED.
2. FACE THE LEFT SHOULDER TOWARDS THE TARGET (RIGHT-HANDED).
3. GRASP THE BOW IN A FIRM BUT RELAXED GRIP.
4. PLACE THE ARROW ON THE STRING, POSITIONING IT WITH THE ARROW NOCKING POINT OUTWARDS.
5. GRASP THE STRING WITH THE FIRST THREE FINGERS OF THE RIGHT HAND. THE TWO LOWER FINGERS ARE UNDER THE ARROW, THE TOP FINGER ABOVE THE ARROW.
6. DRAW THE ARROW BY PUSHING WITH THE LEFT ARM AND PULLING WITH THE RIGHT ARM, HOLDING THE ARROW LIGHTLY BETWEEN THE FINGERS AS YOU PULL THE STRING.
7. AT FULL DRAW, THE ARCHER'S RIGHT HAND RESTS AT HIS "ANCHOR POINT," A SPOT LOCATED ON THE RIGHT SIDE OF HIS FACE OR CHIN, TO WHICH THE ARCHER BRINGS HIS HAND TO TOUCH BEFORE RELEASING THE ARROW.
8. WITH THE ARROW POINTING AT THE TARGET, IN MUCH THE SAME WAY AS YOU WOULD POINT YOUR FINGER, THE THREE FINGERS RELEASE THE STRING. THE ARCHER SHOULD "FOLLOW THROUGH" WITH THE PULL AND RELEASE IN A SMOOTH MOTION.

ARCHERY SAFETY RULES:

1. NEVER SHOOT AN ARROW STRAIGHT UP INTO THE AIR TO SEE HOW HIGH YOU CAN SHOOT IT.
2. NEVER SHOOT AT ANYTHING UNLESS YOU'RE SURE OF YOUR TARGET.
3. NEVER POINT YOUR DRAWN BOW AT ANYTHING YOU DON'T WISH TO SHOOT.
4. CHECK BROADHEADS (SHARPENED ARROWS) AND TIGHTEN THEM CAREFULLY.
5. MAKE SURE YOUR EQUIPMENT IS IN GOOD SHAPE.

U.S./WORLD NEWS

LITTLE ROCK, Ark. — A man arrested on a biological weapons charge for having a lethal extract of the castor bean plant committed suicide yesterday in his jail cell.

Thomas Lewis Lavy, arrested Thursday at his rural Arkansas farm, was charged under the federal Biological Weapons Anti-Terrorist Act of 1989 and faced life in prison if convicted. The FBI lists ricin as third in toxicity behind only plutonium and the botulism toxin. It has no known antidote.

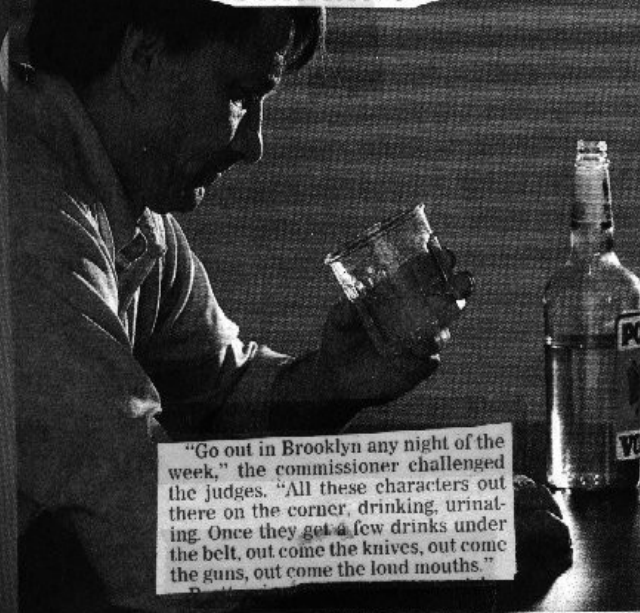

FOUR LEGS GOOD/ TWO LEGS BAD DEPT.

SUFFER THE CHILDREN AGAIN

"This guarantee lets
parents relax."

Those numbskulls up there in Washington (especially the Republican party) have been talking a lot about family values lately. Do they really value 'the family' as a whole? Well- of course they do but not for the reasons most people consider. No- I don't take it that they get all choked up and tear eyed when they see children but they do love kids. Politicians being the demented twisted visionaries they are see many things in children. They see an empty pot for starters to pour their shitstew of half-baked truths and outright lies into to cook to perfection. Interestingly- so rancid and raw is this stew that it takes twelve years to cook! They even have a funny name for it- 'school.' They see a calf which in eighteen years time will turn into a sheep to be sheared every year (around April) but of their money instead of wool. They call this income tax. They see a kid (ironicly) which again in eighteen years time will become a goat- all ready to eat the garbage of society for the next forty odd years give/take a decade. You see after feeding all those kids appetizers in 'school' they're now ready for the main course (heh heh)! They see mules to tend the fields of the wasteland that society has created. After about forty or fifty years these mules would've really made asses out of themselves. If you're a boy- they see a pig who can be herded into farms to be trained to kill other foreign swine while oinking and squealing at them in wartime. If your a girl- they see a rabbit (lucky you). A rabbit whom if she's pretty enough to meet a young buck she can make little bunnies for the system to turn into empty pots, sheep, goats, mules, pigs, and rabbits to keep the old machine running smoothly. Think about this the next time a politician wants to kiss your baaby!!

NOW MIGHT BE A GOOD TIME
TO BRING UP A DELICATE SUBJECT.
DRINKING.

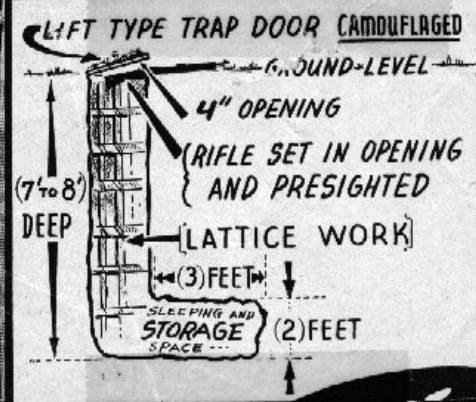

"Go out in Brooklyn any night of the week," the commissioner challenged the judges. "All these characters out there on the corner, drinking, urinating. Once they get a few drinks under the belt, out come the knives, out come the guns, out come the loud mouths."

SUSPENSIONS

The following offenses can cause your immediate suspension school:

1. Use and/or possession of drugs ✓
2. Aggressive act(s) against pupils
3. Aggressive act(s) against staff
4. Disorderly conduct/insubordination ✓
5. Possession of a dangerous weapon
6. Cumulative record ✓
7. In classroom disruption
8. Out of class disruption (cutting) ✓
9. Vandalism ✓
10. Theft ✓
11. Possession of stolen property ✓
12. Arson
13. Pulling a fire alarm
14. Use and/or possession of alcohol ✓
15. Health code violation ✓
16. Forgery ✓
17. Smoking ✓
18. Gambling
19. Molesting

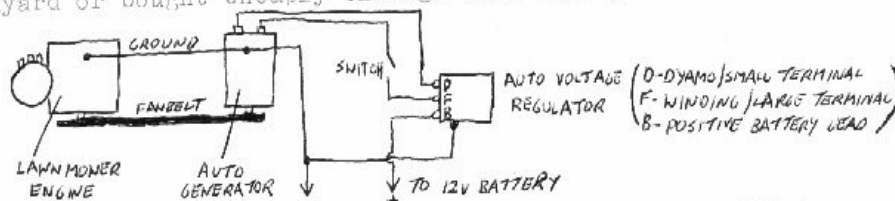

12 DOWN
7 TO GO!

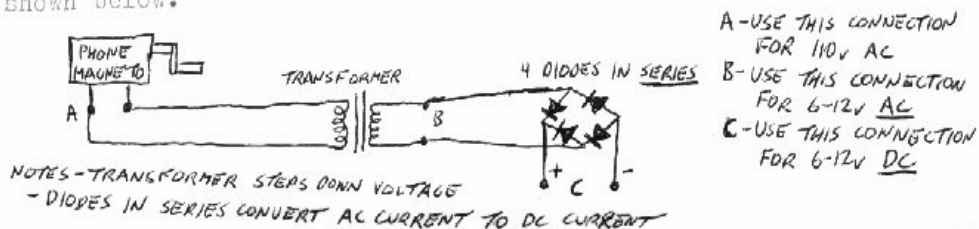

POWER HUNGRY DEPT.

JUNKYARD GENERATORS

Most households today are dependent on some form of electricity from the power company. Now in times of disaster (natural or man made) power outages are common, you would have three options: live by lantern or candlelight, buy an expensive generator, or learn to live in the dark. However, this need not be the case— you can make a 12 volt powerplant from a 1½ HP lawnmower motor, a car generator, and a 12 volt marine/RV deep cycle battery using the diagram presented below. Most parts can be scavenged from the junkyard or bought cheaply through auto supply stores.

Another power generating system which would be useful in an emergency situation is a hand cranked generator. It is built using a phone magneto (like in surplus WW2 military telephones), a voltage transformer, and four diodes. The diagram for it is shown below.

HOW TO AVOID SEEING RED.

KITCHEN CHEMISTRY DEPT.

USEFUL FORMULAS

ALCOHOL SOLID FUEL Dissolve $\frac{1}{2}$ cup of Stearic Acid into $\frac{1}{2}$ a quart of alcohol in one container. Then dissolve 1 tbsp. of Caustic Soda (lye) into $\frac{1}{2}$ quart of alcohol in another container. Warm separately to 140° F and mix the two containers together. Pour this mixture into cans and cool. Store solid fuel in airtight containers.

Glue- Boil mix of 85% resin from spruce, balsam fir, or pine tree and 15% bacon fat or boil the heads, fins, and tails of several fish until only the sticky shit remains.

Uninvited Guests—Mosquitoes

With everything finally set for the family barbecue, another problem arises—mosquitoes! Without insect repellent, your family may finally give up any attempt to eat outdoors. Fortunately, a simple chemical recipe can provide a workable solution. Mix 10 gm of camphor and 10 gm of calcium chloride in 200 ml of ethanol.

JUNIOR, WHERE'S YOUR MANNERS?

Modern Warfare Is a Brutal Form of Hunting

LONG LIVE THE UNABOMBER!!

"Two Thumbs Up!"

That's right kiddies- long live the fucking Unabomber. This nemesis which has very righteously frustrated the high and mighty piggies at the FBI and ATF for almost three decades has struck again this year showering a glimmer of hope amongst the shitstew pot of madbombers shown in the media these days. This wicked messiah is not only an experienced professional in his trade, has some socially redeeming value by choosing the right targets, but isn't an obvious psychopath or neo-nazi. Hmm... almost sounds too good to be true. This mother-fucker has DIY bombmaking down to a science! Shit... he doesn't even go to the hardware store, prefers to make his own fucking screws and painstakingly sands his own wooden cases for Goddess sakes. Now that shows not only true craftsmanship but also a true love and pride in his "work" (dare I say work of art). In addition, his recently released 30,000 word manifesto

(talk about one hell of a press release) has the man more baffled than ever. They don't know whether to take it seriously or see it as a red herring. New theories I'm sure abound every day. One interesting new theory is that the Unabomber isn't motivated by political reasons at all but is driven by a need arising from sexual inadequacy. In non-criminologinose that means he loves filling certain people's faces and chests with shrapnel because he can't get laid (Hahaha)! I'm sorry but that one sounds like a load of bull to me. Losers like that (for example Ted Bundy, Richard Ramirez, Henry Lee Lucas, ad nauseam) tended to hunt down innocent kids and women not corporate executives, rich barons, and the like. Another thought-provoking theory suggests that the unabomber is or may have been connected to an ex-60's type radical whom preached violence to effect social change. Although, this character's name escapes me at the moment (I didn't save the newspaper article)- the writing style of this guy's writings and that in the Unabomber's manifesto is very similar. In addition, to this day this individual is still at large after being captured by the fed's for a bombing and escaping about some odd twenty plus years ago. Now this theory tends to be more logical and consistent with the Unabomber's profile. If he strikes again this year it would be fun to see who he targets for termination this time, which wretched soul he chooses to blow to smithereens! Keep up the good work Unabomber and have an explosive new year hahahaha!!!

CONTROL HEAT BUILDUP

NEW AND IMPROVED C-4
Better Than Ever Recipes for Half the Money and Double the Fun
by Ragnar Benson
This book is for all those readers of the original Homemade C-4 who want to ask for alternatives that eliminated the need for costly, hard-to-find ingredients, as well as any no-messiness. These recipes are dirt-simple, feature widely found, inexpensive, unregulated chemicals and can be assembled in no time. For academic study only. 5 1/2 x 8 1/2, softcover, photos, 88 pp. \$15.00

FMX: THE REVISED BLACK BOOK
A Guide to Field-Manufactured Explosives
by William Wallace
Here is a complete, modern guide to making 45 different explosives for unconventional warfare applications. Includes vital safety guidelines, step by step procedures, a breakdown of explosive components, explosives to avoid, a useful glossary and more. For academic study only. 5 1/2 x 8 1/2, softcover, 162 pp. \$20.00

FOUR MAN'S TNT
Improvised Gunotton
by Seymour Tucker
Gunotton is poor man's TNT. It is the easiest and cheapest explosive you can make. It requires only three easily found and legal ingredients and no special skills, equipment or training. Any gunotton can be improvised in seconds. As the first modern explosive gunotton, also has historic significance. Explosives are dangerous, so this is for academic study only. 5 1/2 x 8 1/2, softcover, 40 pp. \$12.00

CYANIDE GRENADES

By KURT SAXON

The cyanide grenade is a wonderful grenade. It is

much better than the fragmentation grenade as it is not noisy. Nor does it destroy property or cause closed casket funerals.

A modification of it is an excellent protector for the home when you are away. For cleaning out fog bars or enemy emplacements you can find no better weapon. It is easily made and costs next to nothing.

The materials are a 15 ounce tin can, with lid, one square foot of cotton cloth, duct tape, a four ounce glass bottle with a sturdy plastic top, sulphuric acid and cyanide. The igniter is a palm-sized, one inch thick block of wood with a sturdy nail through it.

First, punch a dozen holes in the can with a sharp nail and a hammer.

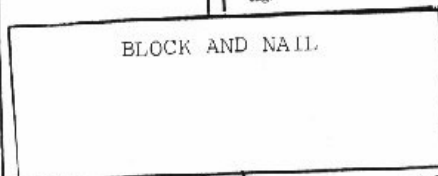

Cut a square foot of cloth into a circle and press it

around the inside of the can with its edges protruding.

Put about an inch of cyanide into the can and put the bottle of sulphuric acid in the exact middle. Fill the can around and above the bottle with more cyanide.

Gather the cloth and tie it tightly with string or wire. Put on the can's lid and seal the grenade on top and around the top side with duct tape.

Cyanide attracts moisture so the grenade should be stored and carried in a sturdy plastic zip lock storage bag.

HALF NAIL

JAGGED CAN METAL

SULPHURIC ACID

CYANIDE

To use, remove from the bag and insert the nail into one of the holes near the middle of the bottle. Give the block a sharp smack with your palm to break the bottle and then toss it into the tomb of your choice.

To booby trap your home is easy. All you need is some wood, sulphuric acid, cyanide, dowel, inner tube rubber band and a plastic butter dish.

For the base, use a one foot long by one inch thick by three inches wide piece of wood. At one end, nail on two pieces of wood which have been drilled to hold a thin dowel. Drill a similar sized hole through the side of one end of another one foot strip of wood. Saw a piece out of the other end to form a notch.

Cut a large nail in half, sharpen it and bang it into the middle of the board about one-third of the way from the notched end.

Cut up a tin can and bend it so there is about an inch on one side of the bend and three inches on the other. Cut two three inch strips of this and cut a deep saw edge on each. Glue or tape the jagged strips about three inches apart on opposite sides of the nail.

Put a strong rubber band cut from an inner tube around the ends of both boards. Stretch it tightly and prop it up with a dowel pointed at the top end. Tie a string to the dowel and stretch it to a door knob or across a corridor or hall where an intruder would be bound to walk into it.

Before leaving your home or office, put a plastic butter dish or like container under the nail. Put a plastic bag with several ounces of cyanide in the dish. Next, put a four ounce bottle of sulphuric acid on the cyanide under the nail.

When an intruder comes in contact with the string, the dowel will be pulled out and the board will slam down. The nail will break the bottle and the jagged tin will shred the plastic bag. The acid will flood the cyanide and in seconds the area will be filled with deadly gas.

The gas dissipates in a couple of hours. Ideally, you should place the trap so you can at least see the taut string when you open the door. If it isn't taut you should hold your breath and go in and open some windows and get out before breathing. At the same time, turn on a fan or air conditioner if you have one.

Shut the door and return in a couple of hours. By then, it should be safe, even if it happened only shortly before you returned.

Go back in and examine the body. Take any money or valuables for your trouble. Dismantle and hide the trap. Open and rummage through some drawers to make the place look like a burglary was in progress.

Call the police and tell them a burglar got in and died of a heart attack or something. There is little chance a thorough autopsy would be conducted and even so, you were out and he had no business there and what could they prove? If it is night and there are no witnesses outside you can dump the vermin in the nearest alley and forget it.

THE ULTIMATE WEAPON IN GERM WARFARE

BACTERIA

Botulism Bacteria

food-poisoning bacteria (*Clostridium botulinum*)

botulinum (bak-u-li-num) *pl.n.* *Str.* *botulinum* (*-i-ti-num*). Any of numerous sometimes parasitic unicellular organisms having various forms and often causing disease. [*C. botulinum*]

DESCRIPTION AND DISTRIBUTION: Botulism bacteria are anaerobic organisms commonly found in the soil that develop toxins in the absence of air. They are sometimes found in spoiled, home-canned, non-acid fruits and vegetables, such as beets, corn, or string beans, and in home-canned meats, marinated vegetables, and salted fish. They may also be found in commercially canned tuna or sausages.

TOXIC PART: Toxins excreted by botulism bacteria.

POISONING: The toxins are chemicals similar in nature to phytotoxins in other plants. Poisoning occurs when the contaminated foods are eaten without having been thoroughly boiled for 10 minutes. Six different types of toxins have been found and designated by the letters A through F. The majority of poisonings are due to toxin types A and E which are associated with inadequately processed vegetables and meats. This type of food spoilage is particularly dangerous because it is not always accompanied by the production of gas, strong odor, or an unusual taste that can be detected. Poisoning can also result from toxins absorbed through cuts in the skin. This toxin is reported to be the most potent poison known to man.

SYMPTOMS: Typical symptoms appear in 12 to 36 hours. They include a feeling of fatigue, vomiting, dizziness, headache, constipation, double vision, sensitivity to light, involuntary movement of the eyeball, constriction of the throat, swollen tongue, difficulty in breathing and swallowing, muscular weakness, and incoordination. In fatal cases death usually occurs in 3 to 6 days due to respiratory failure.

Botulism is fun and easy to make. Fill a jar with corn, green beans, or chopped beets. Drop in a few pieces of meat and about a tablespoon of fresh dirt. Now pour in water until surface tension brings it above the top edge of the jar, then screw on the cap *tightly*. If done properly, there should be no air or next to no air trapped in the jar. It may help if you blend the vegetable used. Put this jar in a dark, moderately warm area for ten days. At the end of this period, you should notice a bloat to the lid of the jar and small amounts of a brownish mold. These are the cultures of *Clostridium botulinum*, which produce the botulinus exotoxin, also known as botulism, as a by-product of digestion.

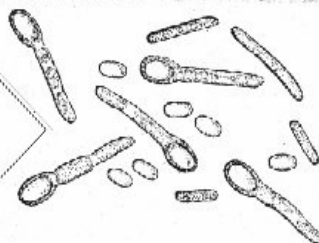

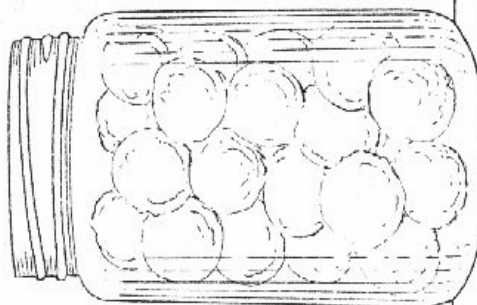

As this can be a hit-and-miss method, use two

Could it be, as former director of Berlin University's Institute of Biology, Professor Jacob Segal has suggested,³⁷ that AIDS does not originate from African Green monkeys at all, but was 'engineered' from two separate viruses at America's secret biological weapons centre in Fort Detrick? He argues that scientists injected the new virus into prisoners during the mid 1970s in return for their freedom, but were unaware of the real nature of their terrible creation.

WARNING:

BIOHAZARD

Germs play dirty.

Virus (Media, \$50.95). Virulent germs terminate mankind except for a few hundred survivors headed by an international B-movie cast.

BOTULISM Botulism poisoning usually occurs when improperly home-canned non-acid foods or meats are eaten without thorough boiling. The rod-like bacterial cells, spore-producing rods, and free spores are shown on the right.

death Made Easy

NEVER MIND THE DOG.. DEPT.

INTRUDER CONTROL DEVICES

The security devices common in urban areas such as deadbolt locks, gates, razor wire, barricades, etc. are usually adequate in keeping out riff raff but not determined intruders. Short of using packs of pitbulls or your own private armed guards you need devices that'll create caustics! The devices shown below can be cheaply made and require no technical expertise to employ.

The Hotfoot- One my favorite personally! A 12 gauge shell is placed in a metal sleeve attached to a piece of wood with a nail in it in a way that the shell extends slightly above the sleeve. It's pressure activated and can be placed on stairs, doors, or scattered in yards.

Light out!- Turn off light, remove it from socket, and drill a small hole in upper neck of bulb. Fill bulb with gasoline and plug hole with electrical tape. **WARNING-** This is important! make sure light switch is off!!! Then screw bulb back in. Any one turning on the light will get an explosive surprise.

Arrest and Search Warrants Prepared for Use in Connection with the Custodial Detention Program

Master Warrant of Arrest WARRANT

TO THE DIRECTOR OF THE FEDERAL BUREAU OF INVESTIGATION
In pursuance of authority delegated to the Attorney General of the United States by Proclamation of the President of the United States, dated _____, I hereby authorize and direct you and your duly authorized agents to arrest on to those charges to the public, peace and safety of the United States.
These persons are to be detained and confined until further order.
I further authorize and direct you and your duly authorized agents, upon or subsequent to the arrest of any person set forth on the attached list and without regard to the place where such arrest may be made, to search any and all premises owned, occupied or controlled by such person, as well as any and all premises where such person is, or during the preceding twelve months period has been, employed or engaged in any regular activity, wherein it is believed that there may be found contraband, prohibited articles, or other materials in violation of the Proclamation of the President of the United States, dated _____, and as set forth in the Regulations issued pursuant thereto, to seize and hold any such articles which you may find and make return thereof to the Attorney General.
I further authorize and direct that this warrant may be executed at any hour of the day or night.
By order of the President

Attorney General

Master Search Warrant WARRANT

TO THE DIRECTOR OF THE FEDERAL BUREAU OF INVESTIGATION
In pursuance of authority delegated to the Attorney General of the United States, by Proclamation of the President of the United States, dated _____, I hereby authorize and direct you and your duly authorized agents to make immediate search of certain premises located and described on the attached list wherein it is believed that there may be found contraband, prohibited articles, or other materials in violation of the Proclamation of the President of the United States, dated _____, and as set forth in the Regulations issued pursuant thereto, namely, firearms, weapons or implements of war or component parts thereof, ammunition, bombs, explosives or material used in the manufacture of explosives, short-wave radio receiving sets, transmitting sets, signal devices, codes or ciphers, cameras, means for promoting biological warfare, radioactive materials, atomic devices, or component parts thereof, propaganda material of the enemy or insurgents, propaganda material which fosters, encourages or promotes the policies, programs or objectives of the enemy or insurgents, printing presses, mimeograph machines, or other reproducing media in which such propaganda (as mentioned) has been or is being prepared, records, including membership and financial records of organizations or groups that have been declared subversive or may hereafter be declared subversive by the Attorney General, cash funds either in currency or coin, promissory notes or checks, securities of any nature, papers, documents, writings, code books, signal books, sketches, photographs, photograph negatives, blue prints, plans, maps, models, instruments, appliances, graphic representations, papers, documents, or books on which there may be inscribed writing relating to or concerning any military, naval, or air, post, camp, station or installation or equipment or of any arms, ammunitions, implements of war, devices or things used or intended to be used in the combat equipment of the land, naval or air forces of the United States, or of any military, naval, or air, post, camp, station or installation, and any and all files, documents, records, documents or papers of any kind which relate in any way to the strategy, activities or operations of any person who is or may be engaged in espionage or sabotage against the interests of the United States.

I further authorize and direct you to seize and hold any such articles which you may find and make return thereof to the Attorney General.
I further authorize and direct that this warrant may be executed at any hour of the day or night.

By order of the President:

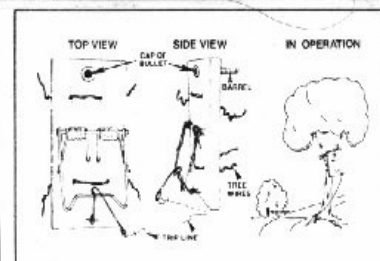

Attorney General

These warrants exist and are ready for Big Brother's use when the occasion arises. So if you have ever had doubts about whether a hideout would be a worthwhile investment, these two master warrants should dispel them.

"Honey, I've only worn it a week."

A Better Mousetrap

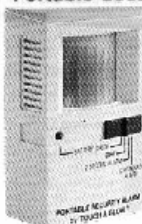

Rat Trap

Thirty-two bobby traps similar to the one pictured above were found surrounding a marijuana patch in Hilo, Hawaii. The device, constructed from an ordinary rat trap, fires 22 Magnum bullets. At the head of the rat trap, a hole is drilled and a piece of copper tubing one quarter of an inch in diameter and two inches in length is inserted from the back. A washer is placed on the face of the trap at the base of this tubing to prevent the bullet from sliding into the tubing. Tar is used to keep the tubing and washer in place. The firing end of the tubing is also dabbed with tar to prevent clogging. The release mechanism is bent so there is a firm catch on the spring action, which acts as the hammer for firing.

The trap is then secured to the trunk or at the fork of a tree about three feet above the ground. Only the green-painted tubing, which protrudes in the direction of the pathway, can be seen. A green cord attached to the trap's release mechanism is stretched across the pathway. When a person walks on the pathway, he trips over the cord, thus releasing the mechanism and activating the trap.

Portable Security Alarm

Infrared motion detector alerts of intrusion from inside AND outside. Senses motion (within a 30-ft. area) anytime during day or night. Protects your valuables and you! Use in homes, condos, apartments, mobile homes, motel rooms, camping and in autos, RVs, cabins, boats and more. Also functions as child safety alert when used in medicine chests, guns racks, etc. Off switch, battery check light, 2-second alarm or continuous alarm. Stands up with wire stand or can be hung. Uses 9-volt battery. 2 3/4" x 3 7/8" x 1 1/2".
4847 Portable Alarm \$29.98
2 or more, \$27.98 each

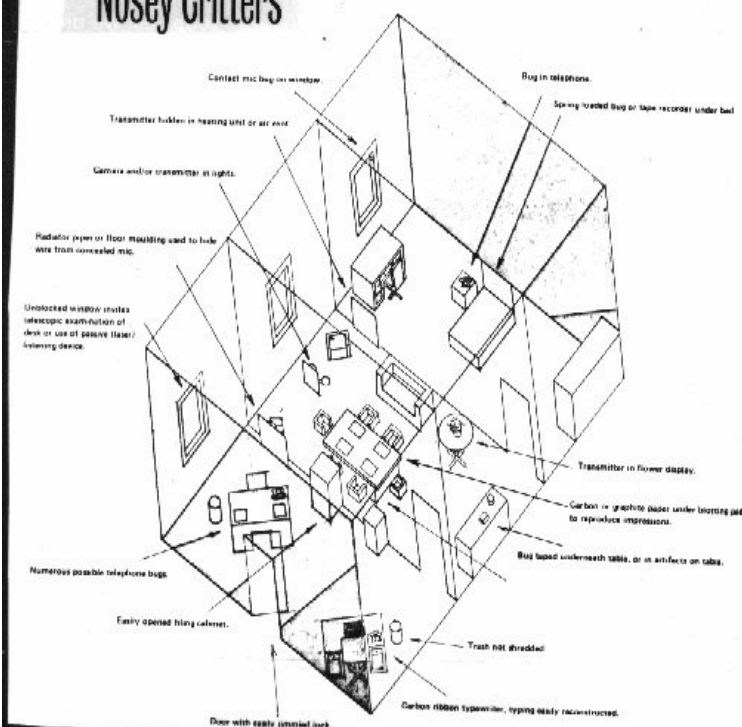

PARANOID SCHIZOPHRENIA DEPT.

TIPS FOR BETTER COMMUNICATION SECURITY

- 1) **FIND OUT MIT!** Always assume the enemy's listening!
- 2) Never answer calls from any outsiders. Talk only to one another in your group and completely ignore everyone else.
- 3) Never use real names of persons. Use only unit call signs and codenames.
- 4) Use authentication codes if you have any doubt about someone on your channel. Agree upon a codeword in advance and give them any two sequential letters of that word. They better respond with the next two letters. For example, if KOPKILLER is the codeword and you gave the suspect station "OP"; the proper response would be "KI". If they respond wrong, order a channel and code change at once.
- 5) If your channel suddenly gets activity- have a pre-arranged backup channel selected.
- 6) Keep transmissions brief, under 15 seconds if possible.
- 7) Change channels, call signs, codes, and authenticators daily! Do not answer calls from anyone using yesterday's codes!
- 8) Give all locations by map reference codes or brevity codes.
- 9) Give all numbers by letter substitutes.
- 10) Use of high-powered CB radios (5 watts +) isn't recommended because of the radio interference it radiates plus it heightens possibility of FCC attention.

Electronic ears to the ground

Nosey Critters

Eavesdroppers

While your opportunities for eavesdropping have increased dramatically, so too have your chances of being eavesdropped on. An eavesdropper can now monitor your cellular phone conversations—either accidentally or on purpose, with the help of a cheap scanning device. No one is safe.

"If you pick up a cordless phone, you've given up your privacy," warns Thomas McCain, Ph.D., a professor of communications at Ohio State University. "And those baby monitors are an open microphone to broadcast what's going on in your house."

Public opinion surveys

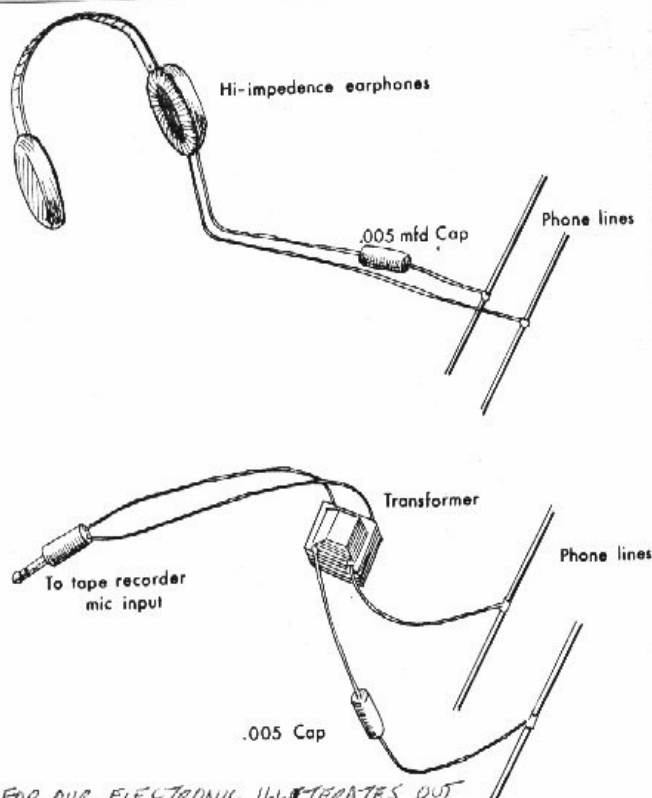

An Ounce of Prevention

QUICK AND DIRTY METHOD OF SECURE RADIO

You will need an older crystal type CB radio for this one. Try to get one with at least 23 channels. Now the first thing you have to do is go to a hobby shops and buy transmit and receive crystals for radio controlled cars/ planes. They run from channels a through e- buy allfive channel crystals. Then you want to open up the CB radio to where the crystals are located. Change the transmit/ receive crystals in the way shown in the table below.

Remove Ch. 4-	27.005 MHz	and replace with Ch. A-	26.995 MHz.
Remove Ch. 7-	27.035 MHz	and replace with Ch. b-	27.045 MHz
Remove Ch. 12-	27.105 MHz	and replace with Ch. C -	27.095 MHz
Remove Ch. 16-	27.155 MHz	and replace with Ch. D-	27.145 MHz
Remove Ch. 20-	27.205 MHz	and replace with Ch. E-	27.195 MHz

Now instead of the CB transmitting on the regular band its transmitting on the radio control band used for model planes and garage doors. Noone listens to this so its pretty safe just be careful about using it around remote controlled planes and the like.

FOR OUR ELECTRONIC ILLITERATES OUT THERE CAP STANDS FOR CAPACITOR - FOUND AT YOUR LOCAL RADIO SHACK. ALSO PHONE LINES HAVE FOUR WIRES NOT TWO - THE WIRES TO TAP ARE RED + GREEN! - ED.

LESS LIKE ART AND MORE LIKE TRASH

INDUSTRIAL TERRORISM DEPT.

THE OBIVILON PROJECT

Poison Pen has considered to do a joint project with the industrial noise band Flowers of Sulfur in creating a new 60- 90 minute tape. We're seeking contributions from Poison Pen readers just like YOU. We want NOISE- anything goes- including but not limited too- fireworks, bullhorns, metal jams, power tools, gunshots, machine gun fire, CB/HAM radios, police scanners, farm animals, heavy machinery, factories, chnats, video games, car engines, kitchen appliances, modem/ fax signals, lawnmowers, very bad piano/organ/ or violin playing, live acts of violence, people fucking. Well you get the picture. Bring the noise and we'll add the sermons which will generally reflect the pathetic state of mankind. All contributors will get a free copy of the finished product. Send all offerings to the world HQ A.S.A.P!

WHAT'S HOT What do you get when you combine Zippo lighters, oil drums, buckets, brooms, trash can lids, and a bunch of hard-

bodied, grungy performance artists?

A Recipe for All Seasons

BANANA BREAD

(Serves 2)

- | | |
|--------------------|-------------------------|
| 4 Laughing Eyes | 2 Milk Containers |
| 4 Loving Arms | 1 Fur-lined Mixing Bowl |
| 2 Well-shaped Legs | 1 Banana and 2 Nuts |

Method: Looking into laughing eyes, spread well-shaped legs slowly. Squeeze and massage milk containers very gently, until fur-lined mixing bowl is well greased. Check frequently with middle finger. Add banana and gently work in and out until well creamed. Cover with nuts and sigh with relief. Bread is done when banana becomes soft. Be sure to wash mixing utensils, and don't lick the bowl.

Note: If bread rises, leave town.

12 WAYS TO HAVE FUN WITH EPOXY

- 1) Glue blown fuses or busted breakers inside a circuit box.
- 2) Glue the gas cap onto someone's tank and seal it forever.
- 3) Glue dead batteries inside compartments of electronics (such as walkmans, radion, remote controls, etc.)
- 4) Glue lightbulbs inside their sockets and break them after.
- 5) Squirt a couple of drops of epoxy in the barrels of guns. Anyone firing this will get a NASTY surprise. Gluing clips in auto pistols works good too.
- 6) Go crazy on power tools by gluing dull bits in drills, nail clips in nailguns, and dull blades in saws.
- 7) Glue razor blades to the wire part of a mousetrap then place it in a bag or dark spot where hands go alot.
- 8) Glue the chain of bicycle onto the chainwheel and/ or derailleur.
- 9) Glue electric plugs into their sockets.
- 10) Glue steel plugs inside water faucets.
- 11) Glue caps on liquor and prescription medicine bottles.
- 12) Glue locks (at the risk of insulting our reader's intelligence we list this one. Use your fucking imagination)!

REVENGE

Regina Barreca, author of *Sweet Revenge: The Wicked Delights of Getting Even* (Harmony Books), is a walking repository of revenge tales. Take the airline reservations agent left to cope with a verbally abusive passenger. "She kept her cool throughout his long harangue," recalls Barreca, "then sent his luggage to Tokyo. He was going to Tennessee!" And there was the woman whose husband left her for a 19-year-old. "Every day for weeks she went to his office parking lot and removed the license plate from his car. He had to spend days at the motor vehicle bureau." Wanting revenge is perfectly normal, says Barreca.

When the Lord created man, all the parts of his body argued over who was to be the boss. The brain explained that since he controlled all parts of the body, he should be boss. The legs argued that since they took man wherever he went, they should be boss. The stomach countered with the explanation that since he digested all the food, he should be boss. The hands argued that since they would be doing all the work, they should surely be boss. The eyes said that without them, man would be helpless, so they should be boss. Finally, the asshole applied for the position of boss. All of the other parts of the body laughed so hard that the asshole became frute and clogged himself up. After a few days, of this, the brain became foggy, the legs wobbled and finally could not support the body, the stomach became violently ill, the hands were so weak they hung at the side of the body, and the eyes became crooked and unable to see. They all relented and made the asshole boss. This proves that you don't have to be a brain to be boss, just an asshole.

DIY MILITARY STYLE RATIONS

A While back we noticed in some testosterone magazines such as Soldier of Fortune a couple of ads for military rations. It sounded cool at first being the lazy outdoors type that hate to cook and can't wait to eat until we noticed the fucking prices. Since they were sold in cases we did some arithmetic and we found out to our horror on the average it would cost \$6 per meal! That's an awful lot of money to eat out of a couple foil pouches. So we figured out how to do it at half to a third the cost by making our own. Each meal had a main dish, a side dish, a junk food dish (dessert), a drink mix, and condiments. With our system meals can be customized according to individual tastes and their availability at your local store. We suggest going to the supermarket rather than your local mame (or bodegas as we call them here) to come out cheaper. Here are some suggestions to get you started off.

MAIN DISHES- Keep your eyes here as the shelves are probably full of these. The best bet is the brand Hormel which makes nice small (8 oz.) cans of just everything like baked beans, beans and franks, lasagna, noodles and chicken, au gratin potatoes, chow mein, even tamales. Also look out for those cans of chunky soup and the ever favorite varieties of pasta like spaghetti, ravioli, and mac n' cheese.

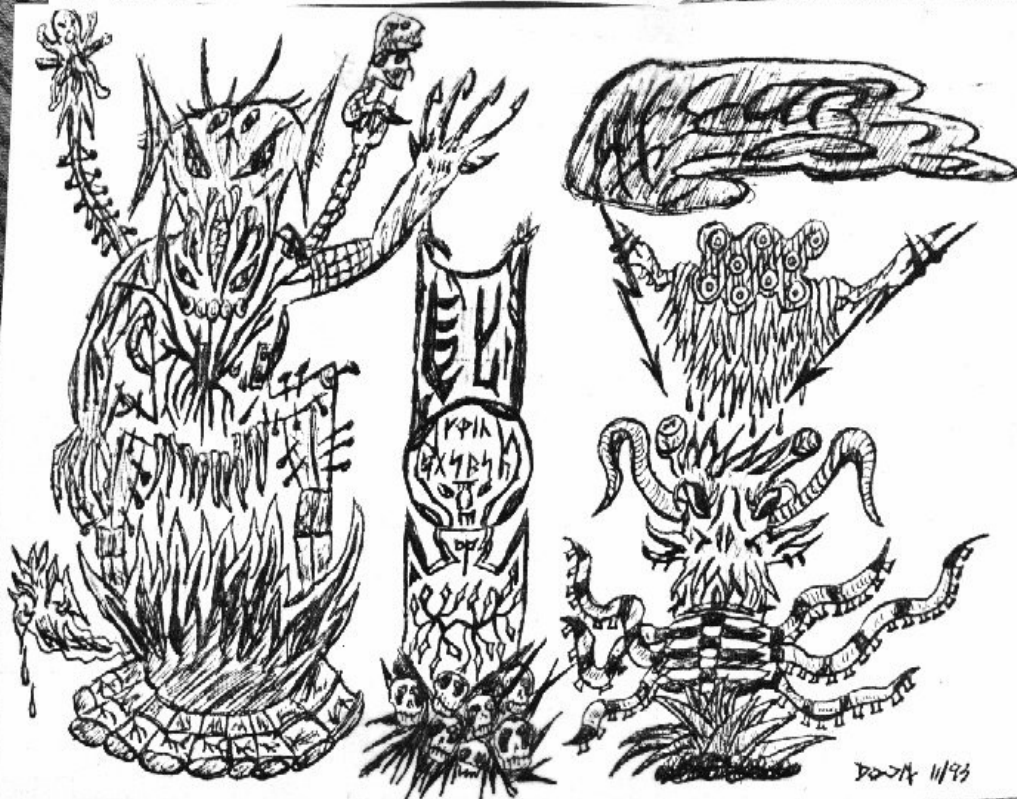

SIDE DISHES- The small fruit cans from Del Monte or applesauce make good dishes.

DESSERT- The little debbies like oatmeal cookies, brownies, honey buns, or those little cups of pudding make good desserts.

CONDIMENTS- Besides the small packets of salt and pepper the sky's the limit. Use soy sauce or hot mustard from chinese food places, catsup from fast food spots, taco bell sauce, or ramen flavor packets.

DRINK MIX- This could be cocoa, iced tea mix, instant coffee, or tang.

Now all that's necessary is to bag each item into a ziploc bag. Say one meal per bag. That's it. Bon appetite!

Have you ever ~~HAD SOMEONE WATCHING YOU~~ thousands of miles away?
